

Contents

1. Introduction

- 1.1 Typographic Conventions

2. Basic SQL

- 2.1 Objectives
- 2.2 Test Data
- 2.3 SELECT Statement Usage
- 2.4 Basic SELECT Statement
- 2.5 Column Selection
- 2.6 Null Value
- 2.7 Arithmetic Operators
- 2.8 Column Aliases
- 2.9 Concatenation Operator
- 2.10 Literal Strings
- 2.11 Duplicate Rows
- 2.12 Summary
- 2.13 Exercises

3. Data Conditioning

- 3.1 Objectives
- 3.2 Test Data
- 3.3 Limiting Rows
- 3.4 Using Literals
- 3.5 Conditional Operators
- 3.6 Additional Conditional Operators
 - 3.6.1 The BETWEEN Conditional Operator
 - 3.6.2 The IN Conditional Operator
 - 3.6.3 The LIKE Conditional Operator
 - 3.6.4 The NULL/NOT NULL Conditional Operator
- 3.7 Logical Conditional Operators
- 3.8 Rules of Precedence
- 3.9 ORDER BY Clause
- 3.10 Summary
- 3.11 Exercises

4. Single Row Functions

- 4.1 Objectives
- 4.2 Test Data
- 4.3 Single Row Functions
- 4.4 Character Functions
 - 4.4.1 Case Manipulation Functions
 - 4.4.2 Character Manipulation Functions
- 4.5 Number Functions
 - 4.5.1 TRUNC
 - 4.5.2 ROUND
 - 4.5.3 MOD
- 4.6 DATE Functions
 - 4.6.1 SYSDATE
 - 4.6.2 MONTHS_BETWEEN
 - 4.6.3 ADD_MONTHS
 - 4.6.4 NEXT_DAY
 - 4.6.5 LAST_DAY
 - 4.6.6 ROUND and TRUNC with dates
- 4.7 Conversion Functions
 - 4.7.1 Implicit Data Type Conversion
 - 4.7.2 Explicit Data Type Conversion
 - 4.7.3 TO_CHAR (With Dates)
 - 4.7.4 TO_CHAR (With Numbers)
 - 4.7.5 TO_DATE
 - 4.7.6 TO_NUMBER.
- 4.8 Nesting Functions
- 4.9 Generic Functions
 - 4.9.1 NVL
 - 4.9.2 NVL2
 - 4.9.3 NULLIF
 - 4.9.4 COALESCE
- 4.10 Conditional Functions
 - 4.10.1 CASE
 - 4.10.2 DECODE
- 4.11 Summary
- 4.12 Exercises

5. Handling Multiple Tables

- 5.1 Objectives
- 5.2 Test Data
- 5.3 Using Multiple Tables
- 5.4 Join Syntax And Rules

- 5.5 Join Types
 - 5.5.1 Equijoin
 - 5.5.2 Non-equijoin
 - 5.5.3 Outer Joins
 - 5.5.4 Self Joins
 - 5.5.5 Cross Joins
 - 5.5.6 Natural Joins
 - 5.5.7 The ON Clause
 - 5.5.8 Three Way Joins
 - 5.5.9 Left Outer Join
 - 5.5.10 Right Outer Join
 - 5.5.11 Full Outer Join
- 5.6 Summary
- 5.7 Exercises

6. Group Functions

- 6.1 Objectives
- 6.2 Test Data
- 6.3 Using Group Functions
- 6.4 Group Function Syntax and Rules
- 6.5 Common Group Functions
 - 6.5.1 AVG
 - 6.5.2 SUM
 - 6.5.3 MIN
 - 6.5.4 MAX
 - 6.5.5 COUNT
- 6.6 NVL and Group Functions
- 6.7 The GROUP BY Clause
- 6.8 The HAVING Clause
- 6.9 Summary
- 6.10 Exercises

7. Subqueries

- 7.1 Objectives
- 7.2 Test Data
- 7.3 Purpose of a Subquery
- 7.4 Subquery Syntax and Rules
- 7.5 Subquery Types
 - 7.5.1 Single Row Subqueries
 - 7.5.1.1 Single Row Subqueries and Group Functions
 - 7.5.2 Multiple Row Subqueries
- 7.6 Subqueries and the HAVING Clause
- 7.7 Null Values in a Subquery
- 7.8 Summary
- 7.9 Exercises

8. Data Manipulation

- 8.1 Objectives
- 8.2 Test Data
- 8.3 Data Manipulation Language (DML)
- 8.4 INSERT Statement
 - 8.4.1 INSERT VALUES Clause
 - 8.4.2 INSERT and Nulls
 - 8.4.3 INSERT Rules
 - 8.4.4 INSERT and Functions
 - 8.4.5 INSERT and Substitution Values
 - 8.4.6 Inserting Rows From Another Table
 - 8.4.7 INSERT with Subqueries
- 8.5 UPDATE Statement
 - 8.5.1 UPDATE with Literal Values
 - 8.5.2 Updating Rows From Another Table
- 8.6 DELETE Statement
 - 8.6.1 DELETE with Literal Values
 - 8.6.2 Deleting Rows Based On Another Table
- 8.7 Default Values.
- 8.8 MERGE Statement
- 8.9 Database Transactions
 - 8.9.1 DCL Transactions
 - 8.9.2 DDL Transactions
 - 8.9.3 DML Transactions
 - 8.9.4 Transaction Lifecycle
 - 8.9.5 Data State
 - 8.9.6 Implicit Transaction Handling
 - 8.9.7 Statement Level Rollback
 - 8.9.8 Read Consistency
 - 8.9.9 Locking
- 8.10 Summary
- 8.11 Exercises

9. Table Management

- 9.1 Objectives
- 9.2 Test Data
- 9.3 Object Types
- 9.4 CREATE
- 9.5 Table Scope
- 9.6 Tables used in Oracle
 - 9.6.1 User Tables
 - 9.6.2 Data Dictionary Tables
- 9.7 Data Type
- 9.8 DATETIME Data Types
 - 9.8.1 Timestamp
